für verstärktes Ensemble / for amplified ensemble

Dauer / Duration: ca. 55'

Der Erste Satz des Stückes wurde durch einen Kompositionsauftrag der Fromm Music Foundation ermöglicht.

Movement 1 of this piece was made possible by a grant from the Fromm Music Foundation.

Harmoniemusik kann sowohl in kompletter Länge (ca. 55') oder in Teilen gespielt werden, wobei dann entweder der erste Satz alleine, oder der zweite und dritte Satz (2 und 3 immer zusammen als Einheit) gespielt werden können.

Harmoniemusik can be performed either in full length (55'), or in separate parts, whereas either the first movement would be played alone, or the second and third movement (these two always together as a unit).

## Amplification and Reverb

All instruments are slightly amplified, with the signal routed to speakers close to them.

The reverberation is routed to all four speakers to create a blend of all instruments.

The sonic landscapes of Harmoniemusik exist somewhere between ambience or acoustic environment, and articulated structures emerging from this environment. A concert experience that supports the ambience aspect of the piece with means of lighting design or illumination is strongly recommended, particularly in traditional concert halls, which often suggest a musical discourse that is far more motive and development oriented, than the musical discourse of Harmoniemusik.

## Verstärkung und Hall

Alle Instrumente sind leicht verstärkt und das Audiosignal wird zu nahestehenden Lautsprechern geleitet.

Der Hall wird zu allen vier Lautsprechern gleichermaßen geleitet, um eine Mischung aller Instrumente zu erreichen.

Die Klanglandschaft von Harmoniemusik ist zwischen Ambience oder akustischen Environment und daraus hervorgehender artikulierter Strukturen verortet. Eine Konzerterfahrung, die den Ambience Aspekt des Stücks durch mit Licht-Design unterstützt wird daher empfohlen, insbesondere in traditionellen Konzertsälen, die ja oft eher einen musikalischen Diskurs nahelegen, der im Gegensatz zum Diskurs in Harmoniemusik auf motivischer Arbeit und Entwicklung basiert.

## Harmoniemusik

Harmoniemusik was written in a time of both political as well as personal experience of grief. It is the attempt to create a "Happy Place" for an hour, even though it can never entirely escape the experience that it tries to leave behind.

The sonic textures of Harmoniemusik gently oscillate somewhere between acoustic ambience and articulated structures. The soft pulses, small melodies, and slowly emerging chords of Movement 1 create a consonant surface that is perpetually in motion. With just single repeated notes at first, then groups of notes, and eventually small motives, the seven instruments build up a seemingly tension-free harmony while continuously changing it. Movement 2 starts off with an exuberant, life-embracing Vivace that only gradually softens into a dreamlike landscape of quietly pulsating chords. The third movement alternates between slow-motion arpeggios spanning all registers of the small ensemble and fast pulses that remember the textures of Movement 1. A brief coda that ends the hourlong Harmoniemusik paradoxically appears to be surprising and familiar at the same time. Besides their joyful and gentle surface the three movements of the work cannot deny slightly uncanny undercurrent that poses a constant risk of drift towards the music's disappearance into silence or towards increasingly aggressive beats – a violent threat to the very soft and musical figures from which it emerged.

Harmoniemusik is dedicated to Sianne Ngai.

## Harmoniemusik

Harmoniemusik entstand in einer Zeit der Erfahrung sowohl gesellschaftlicher als auch ganz privater Trauer. Es ist der Versuch der Erschaffung eines glücklichen Ortes, eines "Happy Place", auch wenn dieser der Erfahrung, der er für eine Stunde entgleiten möchte, nie ganz entkommen kann.

Die Texturen von Harmoniemusik oszillieren sanft zwischen fast anonymer Klanglandschaft und artikulierten musikalischen Figuren. Die stillen Pulse, die kleinen Melodien, und die langsam aufscheinenden Akkorde des ersten Satzes gestalten eine konsonante Oberfläche, die sich in ständiger Bewegung befindet. Mit zuerst nur einzelnen Tönen, dann Gruppen von Tönen, und schließlich kleinen Motiven erschaffen die sieben Instrumente eine scheinbar spannungsfreie Harmonie, die sie zugleich kontinuierlich verändern. Der zweite Satz beginnt mit einem überschäumenden, weltumarmenden Vivace, dessen Schwung nur allmählich in eine fast traumhafte Landschaft sanft pulsierender Akkorde übergeht. Der dritte Satz alterniert zwischen zeitlupenhaften Arpeggiros, die alle Register des kleinen Ensembles umfassen, und schnellen Pulsen, die an die Texturen des ersten Satzes erinnern. Eine kurze Coda endet die einstündige Harmoniemusik zugleich auf paradox überraschende und familiäre Weise. Die fröhliche und harmonische Klangoberfläche aller drei Sätze kann eine düsterere Unterströmung jedoch nicht ganz ignorieren. Es ist die immer wieder präsente Gefahr eines leisen Verschwindens der Musik in Stille einerseits, oder in laute Schläge andererseits – eine gewaltsame Bedrohung genau jener sanften Pulse, aus denen diese Schläge hervorgingen.

Harmoniemusik ist Sianne Ngai gewidmet.

 Für die verschiedenen Dämpfungsstufen die Position des Fingers variieren (nah am Kapodaster = viel Ton, weg vom Kapodaster = wenig Ton);  
 Kontaktlänge der Fingerkuppe variieren. Für voll abgedämpften Ton evtl. mehrere Finger nehmen. Kein Druck, da sonst die Tonhöhe verändert wird!

 For the different dampening position: move finger positions (close to capo bar: more pitch – away from capo bar - less pitch);  
 vary amount contact surface of fingertips. For fully damped sound it might be necessary to use several fingers. No pressure whatsoever, since it changes the pitch!
